

STOPRAY NEUTRAL

Enjoy the best of what the sun has to offer

With the **Stopray** range, you enjoy the best of what the sun offers. These coated glasses ensure your interior is flooded with natural light while blocking out excess heat.

Stopray Neutral is AGC's new generation of double silver solar control coatings, combining the highest level of neutrality with excellent solar protection and extremely low light reflection.

Stopray Neutral coatings offer the very best neutral grey transparency, enhancing indoor user comfort by making optimal use of the natural light spectrum and delivering the necessary thermal comfort.

The **toughenable (T) versions of Stopray Neutral** products can be bended and perfectly combined in a facade alongside their non-toughened counterparts since they are identical in appearance and deliver the same performance.

Stopray Neutral Benefits

Low light reflection

Excellent transparency thanks to low light reflection in line with modern design trends.

Maximum energy efficiency

Lower air conditioning and heating costs.

Protection from the sun

Excellent natural light throughput combined with superb solar protection.

Unlimited design options

Available in a wide range of solutions from Clearvision to bended glass.

Stopray coatings are Cradle to Cradle Certified and have a third-party verified Environmental Product Declaration (EPD)

Your Dreams, Our Challenge

Double glazing 6-16-4 (with 90% Argon)

	Position coating	LT (%)	SF (%)	LR ext (%)	LR int (%)	Ug value W/(m².K)
Stopray Neutral 60/33 (T)	#2	60	33	13	11	1.0
Stopray Neutral 50/27 (T)	#2	50	27	13	11	1.0

Triple glazing 6-16-4-16-4 (coating in #2 - Clearvision - iplus 1.1 in #5 - with 90% Argon)

	Position coating	LT (%)	SF (%)	LR ext (%)	LR int (%)	Ug value W/(m².K)
Stopray Neutral 60/33 (T)	#2	55	31	15	15	0.5
Stopray Neutral 50/27 (T)	#2	46	25	14	14	0.5
